

STALICO CO² NEUTRAL BALLOON LIGHT 7.2 M

The STALICO Co² Neutral Balloon light is the most sustainable light pole on the market. This means one week of lighting becomes possible without generator, filling up or power supply. For independent and noiseless use on the move. With a battery pack of for example 720 Ah 48 V, this light pole guarantees \pm 50 hours of autonomous operation and the most CO-neutral 600W LED balloon lighting of your site. The innovative light pole container can be moved, stacked and hoisted. It is very stable and can be erected by one person.
