

STALICO TRANSPORTER EA13

With the user-friendly STALICO Transporter you can transport camera poles and light poles to any site behind a car or light-duty truck. The Transporter is a unique transportation concept made of hot-dip galvanised metal with a European braked chassis. The trailer is suitable for all European countries and indispensable for any user in possession of a STALICO extending pole. It is CE-certified and supplied with a CE declaration.
