

STREET LED+ 120W

The Street LED+ has a very modern appearance with its simple and very thin design. This lamp has very powerful heat extraction with its fine structure. It is IP66 certified. The Street LED+ is highly suitable for temporary street lighting, car parks and internal roads. Ideal for assembly on our stationary battery towers. Its simple design means the Street LED+ is easy to install and maintain. It also has a wide range of wattage so the light can be used for different applications.
