

GR COMPACT HYBRID

The GR Compact Hybrid supplies energy for LED lighting, mobile cameras, communication towers and serves as an emergency generator. This hybrid power unit for light and camera poles offers lower fuel costs, noise and emissions. The generator stops when the battery pack has charged and starts again when the batteries are emptied by consumption from the light or camera. The GR Compact Hybrid sits perfectly with the sustainable philosophy of GR Technics, offering 60% CO2 reduction.

SPECIFICATIONS

- Diesel tank: 140 l gas oil
- Engine : Kubota Z482 3.2Kw 1500rpm water cooled
- Inverter Victron Multi 24/3000 / 70-16
- Battery pack: 8 x 200 Ah 12 V
- Weight: 1184 kg
- Dimensions: 191 x 66 x 130 cm
